QUALIFICATIONS

BSc Information Technology Degree in Software Engineering, Eduvos (previously known as Pearson Institute of Higher Education) (2025)

Higher Certificate: Office Application Specialist, ATTI College (2022)

Matriculated (2020)

CAREER HIGHLIGHTS

- Developed a full-stack consumer-to-consumer e-commerce website and Android App.
- Inducted into the Golden Key International Honour Society for academic excellence.
- Awarded Top 10 Best Student Certificate by Eduvos University's Faculty of Information Technology.
- Experience upgrading and maintaining computer hardware such as SSD and RAM installations.
- Applied Python, PHP, and MySQL to build functional database-driven web and mobile solutions.
- Led outdoor hygiene initiatives as a volunteer Environmental Health Official.

EXECUTIVE SUMMARY

Recent BSc Information Technology (Software Engineering) graduate with a strong interest in IT Support, Service Desk Operations, and Systems Administration. Recognised for academic excellence as a Top Achiever and inducted into the Golden Key International Honour Society. Demonstrated leadership abilities by serving as a Hackathon Team Leader, coordinating team activities and problem-solving under time constraints. Skilled in troubleshooting software issues, supporting end users, performing hardware upgrades, and working within Windows-based environments. Eager to build a career in IT Support and contribute effectively within a professional technical support team.

KEY SKILLS

Technical Skills

- Microsoft Office Suite
- Microsoft 365 (OneDrive, SharePoint, Outlook)
- Software Installation & Configuration
- Password Reset & Account Support
- Hardware & Peripheral Troubleshooting
- Wi-Fi & Ethernet Connectivity Basics
- Basic Networking Concepts
- Full-Stack Development (HTML, CSS,

Tools & Technologies

- GitHub, VS Code, PyCharm
- WampServer, AMPPS
- Figma, Canva
- Windows 10/11
- Microsoft Office 365
- Android Studio

Professional skills

- Customer Service
- Problem Solving
- Communication Skills
- Team Collaboration
- Attention to Detail
- Time Management
- Adaptability
- Ability to Work Under Pressure
- Following Procedures

- JavaScript, PHP)
- Python Programming
- Software Testing & Debugging
- Database Fundamentals (SQL)
- MySQL
- Firebase
- Continuous Learning

PROFESSIONAL INTERESTS

- Software and technology projects
- Data and digital solutions
- Software testing and problem solving
- Technology that improves organisations and communities
- Team-based software development
- Learning and growing in the tech industry
- Digital transformation and data analytics
- Agile software delivery environments

NETWORKING KNOWLEDGE

- Understanding of IP addressing fundamentals
- Basic Wi-Fi and Ethernet networking concepts
- Basic knowledge of VPN connectivity
- Understanding of network troubleshooting principles
- Familiarity with internet connectivity troubleshooting

PROFESSIONAL CAREER EXPERIENCE

IT Support & Technical Project Experience (Academic & Project Experience), 2023 – 2025

- Diagnosed and resolved software issues during application development and testing.
- Performed troubleshooting and debugging to ensure reliable system performance.
- Tested applications and validated system functionality across multiple use cases.
- Assisted team members with technical issues during project development.
- Worked with Windows-based development environments and software tools.
- Maintained technical documentation and testing records.
- Collaborated with project teams to meet deadlines and deliver working solutions.
- Applied structured problem-solving techniques to identify and resolve technical challenges.

Achievements:

- Successfully tested a full-stack e-commerce platform supporting 50+ product listings and user authentication.
- Tested and validated 4 Android applications with 90%+ usability satisfaction during peer reviews.
- Recognised among Top 5 IT students for project quality and system reliability.

MAJOR COMPLETED PROJECTS

ProcurePath Platform (Full-Stack Development)

Website: <https://procurepath.co.za>

- Designed and developed a production-level responsive website based on client requirements

- Applied backend logic and database integration (PHP & MySQL)
- Performed testing and validation to ensure data accuracy, reliability, and consistent user experience
- Supported structured workflows and responsive functionality aligned with client requirements

E-Commerce Platform (C to C E-Commerce website)

- Developed a consumer-to-consumer platform with authentication and database integration
- Implemented structured logic for transactions and user management
- Tested system workflows to ensure correctness and reliability

Android Application (localConnect app)

- Designed and implemented structured application logic and user flows
- Tested functionality across different use cases to ensure consistent behavior

SOFTWARE TESTING & DATA EXPERIENCE

- Performed manual testing and debugging during development projects
- Validated system outputs and database interactions for accuracy and consistency
- Maintained testing documentation and tracked defects during project cycles
- Applied structured problem-solving and logical analysis during software development
- Worked with data-driven systems using MySQL and PHP

IT Student & Academic Achiever, Eduvos University, 2023 – 2025

- Completed core modules in software engineering, database systems, mobile development, and IT project management.
- Applied programming skills in Python, fundamental skills in Java & PHP, and web technologies to academic and personal projects.
- Participated in Hackathon and Hackjam events, enhancing collaborative problem-solving and technical agility.
- Led a team during Hackathon competition, coordinating tasks and supporting project delivery under strict deadlines.
- Collaborated with team members to solve technical challenges and deliver functional software solutions.
- Demonstrated leadership, communication, and teamwork skills in competitive project environments.

Achievements:

- Inducted into the Golden Key International Honour Society for academic excellence.
- Recognized with one of the Top 10 Best Student Certificate in the Faculty of Information Technology.
- Completed 15+ academic projects including a capstone software engineering deliverable.

Volunteer Environmental Health Official, Free State Psychiatric Complex Clinic, June 2018

- Led and coordinated outdoor hygiene and sanitation improvement projects within the clinic grounds.
- Engaged with clinic staff and community stakeholders to promote health and safety awareness.
- Maintained cleanliness standards and supported environmental health compliance initiatives.

Achievements:

- Assisted with compliance monitoring and reporting within regulated health and safety environments.
- Followed structured procedures and maintained accurate records.
